what is GAVEL?

GAVEL is XIRA's **free**, cloud-based, practice management software. GAVEL integrates a suite of software tools enabling solo practitioners and small firms to efficiently start and/or manage day-to-day operations of their legal practice.

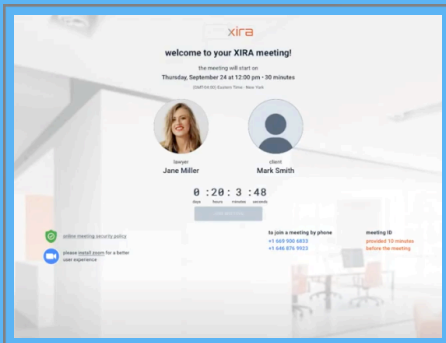

XIRA is abolishing the paid subscription model for legal tech tools by providing GAVEL complimentary to attorneys registered on XIRA. GAVEL is a single, centralized practice management platform designed for solo practitioners and small law firms to efficiently start and/or manage their practice.

GAVEL provides an end-to-end integrated solution, so your data never has to be moved or shared between different applications. The integration of practice management, invoicing, electronic payments, document vault, messaging, and online scheduling keeps all your data in one secure, encrypted location. GAVEL provides the highest level of data security for your firm and clients and gives you peace of mind by eliminating data fragmenting / crumbs across your devices.

XIRA continually enhances GAVEL with innovative functionality (such as electronic payment acceptance and coming soon - electronic signature capabilities) to help solo practitioners and small law firms automate administrative tasks, reduce operating costs, and increase revenues by spending more time doing actual billable work for clients.
